## At-A-Glance: Mitigation Strategies

Public health officials, K-12 administrators, school district officials, and occupational safety and health professionals can use this resource to help reduce the risk of spreading COVID-19 at schools. To use this tool, walk through the school building, in-person or virtually, to assess if the strategies are planned or implemented in each setting and modify plans appropriately and where feasible to ensure a safe opening. It is important to remember this is **not** an exhaustive list; it is a set of select COVID-19 mitigation strategies. It is also important to note that staff and students should stay home when sick and that engineering controls such as using physical barriers and increasing ventilation should be considered, where feasible. The implementation of COVID-19 mitigation strategies should be guided by what is feasible for the school and its staff. Detailed information about the mitigation strategies are presented throughout the checklists and appendices in this toolkit.
