

The FDA is committed to helping ensure the public has access to a wide variety of test options for COVID-19. Since the start of the pandemic, we have authorized **over 300** tests and collection kits, including:

		
235 MOLECULAR	63 ANTIBODY	11 ANTIGEN

SUCH AS:

				
38 HOME COLLECTION	18 POOLING	17 POINT-OF-CARE	11 MULTI-ANALYTE	3 AT-HOME
<i>Tests and collection kits where samples are collected at home and sent to a lab for processing</i>	<i>Tests that process samples from multiple people at one time</i>	<i>Tests that rapidly return a result at your doctor's office or other health care setting</i>	<i>Tests that detect the virus that causes COVID-19 as well as other viruses like flu</i>	<i>Tests performed at home with a self-collected sample</i>

Current as of 12/28/2020
