- **Additional Resources**
 - [CDC: Influenza \(Flu\)](#)
 - [CDC: Flu Treatment](#)
 - [FDA: Influenza \(Flu\) Antiviral Drugs and Related Information](#)

Although there currently is not a nationwide oseltamivir phosphate oral suspension shortage, we are aware there may be localized shortages where demand is especially high. Section 2.6 of the approved oseltamivir phosphate labeling (package insert) includes pharmacist instructions for oral suspension emergency compounding (final concentration 6 mg per mL) from 75 mg oseltamivir phosphate capsules when commercial oral suspension supplies are not readily available from wholesalers or the manufacturer.
