COVID-19 TESTING IF YOU ARE VACCINATED

| COVID-19 |

You did your part by getting vaccinated, but you still have an important role to play in stopping this pandemic.

By getting tested you protect the people around you, including your loved ones.

Some people who are vaccinated still get COVID-19.

Encourage your friends and family to get vaccinated.

So, if you have symptoms, especially if you've been around someone with COVID-19, you should get tested.

Remember, if you feel sick, get tested.
