The Center for Tobacco Products of the Food and Drug Administration (FDA) has carefully considered the potential environmental impact of these actions and has concluded that these actions will not have a significant effect on the quality of the human environment. Specifically, the potential environmental impact of these actions is virtually the same as that of the no action alternatives. Therefore, an environmental impact statement is not required. The evidence supporting this finding is contained in the attached programmatic environmental assessment, which is available to the public upon request. The agency prepared the environmental assessment under the Council on Environmental Quality's regulations (40 CFR 1500-1508) implementing the National Environmental Policy Act.
