Misuse of Prescription Pain Medication Public Service Announcements**

**“All”
Length: 30 Seconds**

All drugs have a real potential for harm – even prescription pain relievers when abused. Taken alone, or taken with other drugs, prescription pain medications can kill. If you, or someone you know, are abusing prescription medications, call the addiction treatment 24-hour helpline at 1-800-662-HELP. That’s 1-800-662-HELP.
