### **Appendix: Discussion Questions**

If commenting on behalf of a child or other loved one, please answer the following questions as much as possible from the patient's perspective.

## Topic 1: The effects of your bleeding disorder that matter most to you

- 1. Of all of the symptoms that you experience because of your condition, which one to three symptoms (bleeding or non-bleeding) have the most significant impact on your life? (Examples may include joint damage/pain, infections, prolonged and heavy bleeding with menstruation, fatigue, etc.)
- 2. Are there specific activities that are important to you, but that you cannot do at all, or as well as you would like, because of your condition? Please describe, using specific examples. (Examples may include participating in physical activities, attending work/school, and family/social activities, etc.)
- 3. How have your condition and its symptoms changed over time?
- 4. What worries you most about your condition?

# Topic 2: Perspectives on current approaches to treatment

- 1. What are you currently doing to treat your condition or its symptoms? (Examples may include blood transfusions, replacement therapies, over-the-counter products, and/or other therapies).
  - a. How well do these treatments work for you?

- b. What are the most significant disadvantages or complications of your current treatments, and how do they affect your daily life?
- c. How has your treatment changed over time and why?
- d. What aspects of your condition are not improved by your current treatment regimen?
- e. What treatment has had the most positive impact on your life?
- 2. If you could create your ideal treatment, what would it do for you (i.e., what specific things would you look for in an ideal treatment)?
- 3. If you had the opportunity to consider participating in a clinical trial studying experimental treatments, what things would you consider when deciding whether or not to participate?
