

FDA FACT SHEET

SCIENTIFIC CONFERENCE GRANT PROGRAM

Program Description

- The purpose of a Small Conference Grant is to facilitate federal financial assistance in support of small conferences and scientific meetings clearly defined within the FDA mission.
- Awards up to \$50,000.
- Awarded twice a year (calendar year).
- Provides financial assistance to allow various organizations to meet and collaborate on current and emerging human food, animal food, drug and device issues impacting health and safety.
- To conduct scientific meetings, symposiums, seminars, workshops or any formal meeting, whether conducted face-to-face or virtually to exchange information and explore a defined subject issue or area of concern impacting the public's health within the scope of FDA's mission.

Intended Outcomes

- To provide a forum for all stakeholders – regulatory agencies, academia, industry, consumers, state legislators, boards of health and agriculture and other interested parties to network, learn and improve public health initiatives.
- To advance scientific knowledge (concepts, methods, technologies, services, preventive interventions).
- To communicate and disseminate key FDA objectives and mandates.

Program Metrics

- Current program funding: \$583K
- Current number of awards: 18
- Current number of grantees: 12

The FDA, an agency within the U.S. Department of Health and Human Services, protects the public health by assuring the safety, effectiveness, and security of human and veterinary drugs, vaccines and other biological products for human use, and medical devices. The agency also is responsible for the safety and security of our nation's food supply, cosmetics, dietary supplements, and products that give off electronic radiation, and for regulating tobacco products.
