TEST KIT CONTENTS

- 1** Login and register your test kit online: www.rapidrona.com/instructions. Enter the barcode found on top of the sample box when prompted. Select your return delivery preference: scheduled FedEx pickup or drop off at a local FedEx Dropbox. If you are under the age of 18 please ask your parent or guardian for help with this kit. Children 14-17 can self-collect under adult supervision, while children ages 2-13 require adult assistance.

- 2** Place kit contents on a clean, dry surface with enough room to collect your sample.

- 3** Wash your hands for at least 20 seconds and dry.

- 4** Remove sample swab from its packaging. Do not touch the tip and do not set the swab down.

- 5** Insert the collection tip of the swab into one nostril until it can't be seen (usually about 1/2 inch to 3/4 inch). If you are collecting a sample from a younger child, insert swab less than 1/2 inch). Rotate swab firmly against the inside wall of the nostril 4 times taking about 15 seconds to collect the sample.

- 6** Repeat step 5 in your other nostril, using the same tip.

- 8** Wash your hands for at least 20 seconds and dry.

- 10** Place tube into biohazard bag with absorbent pad. Seal the bag.

- 12** Place lab sample box into shipping envelope and seal.

- 7** Open pre-filled saline collection tube provided and place sample swab in tube, tip first into the liquid. Screw cap back on.

- 9** Using a pen, neatly write your first & last name AND date of birth on tube label. Peel off the sticker back and place the label length-wise on the tube.

- 11** Place biohazard bag into lab sample box and insert tabs to seal box.

- 13** Ship your sample SAME DAY OF COLLECTION. Whether you selected a FedEx pick up or Drop Off during registration, be sure to get your sample to FedEx the same day of collection.
